

Recommendation Letter for Gabriel Adams

March 14, 2025

I am pleased to write this letter of recommendation for Gabriel Adams who is applying for a travel grant to attend the ERAU-NASA-NSF Aerospace Cybersecurity Workshop. Gabriel is an undergraduate Computer Science student/cybersecurity concentration.

Gabriel has been quite actively participating in national cybersecurity competitions. He served as captain for the CCDC 2025 competition where his team passed the qualifiers and is currently competing for regional. He also led the CRAM team to Dahlgren Virginia as a national finalist. He is an MS fast-track student currently working on a satellite security research problem and he is developing a testbed at Tennessee Tech for his research.

I believe Gabriel will benefit a lot from the opportunity of attending the ERAU-NASA-NSF Aerospace Cybersecurity Workshop to learn about aerospace security topics and refine his research problem and hands-on skills. For his skills and the expected benefit, I highly recommend Gabriel to receive this travel scholarship.

If you have any questions, please do not hesitate to reach out to me.

Sincerely,

Muhammad Ismail, PhD, SMIEEE
Director of Cybersecurity Education, Research, and Outreach Center (CEROC),
Associate Professor of Computer Science,
College of Engineering,
Tennessee Tech University,
